

**Witness with the  
love of God in  
action**  
(Indonesia)

Tsunamis, earthquakes, volcanoes, floods. Indonesia has had them all within a short span of time. It is difficult to comprehend the tragedies that the people have endured.

The February 2007 flooding in the capital region around Jakarta once again tested the disaster readiness of relief agencies in Indonesia and around the world. ELCA International Disaster Response companions Church World Service (CWS) and YAKKUM Emergency Unit (YEU) were able to respond immediately to the needs of the people. Water, food, blankets, and tents were provided.

Stagnant flood waters breed disease. Children are especially vulnerable to water-borne diseases and their symptoms, including coughing, diarrhea, fever, asthma, and headaches. Your gifts to ELCA International Disaster Response helped provide medical assistance for hundreds of people.

All this would not have been possible had it not been for the emergency preparedness maintained by CWS and YEU. Ever since the 2004 tsunami, your contributions have also helped the church in Indonesia continue to witness with the love of God in action. Thank you.
