

Prepared for a better life – (India)

Your gifts to the ELCA World Hunger Appeal, through its partner the Lutheran World Federation, help fund this development effort in India.

Saleha Bibi and her husband are farmers in the village of Dharamsala in India. They are parents of five children. Saleha, like other women in her community, was not allowed to take part in gatherings or any decision-making processes with men.

The Lutheran World Federation (LWF) came into the village to begin education on disaster preparedness. Saleha and other women were invited into the conversations. “We had depended on external relief assistance after floods,” said Saleha. “We had no concept of preparedness.”

Saleha is now the secretary of the disaster management committee in the village. She learned basic concepts of preparedness and also learned about personal health and hygiene. “Open-air defecation was common and too near our tubewell which is our only source of drinking water. We now know that waterborne diseases and infections were rampant.”

“Thanks to LWF, our capacities have increased. We now think in terms of how to reduce the impact of future disasters. We know flooding will occur but we can take action for a better future.”

Thanks to the LWF and your support through the ELCA World Hunger Appeal you have made a difference in Saleha’s daily life.
