

## CONFERENCE THEME

This conference explores relationships between religious belief and biological evolution, and marks the anniversary of Charles Darwin's birth 200 years ago and the publication of his groundbreaking work, *Origin of the Species*, 150 years ago. The symposium celebrates our knowledge of the world – of God's creation – gained through science and evolutionary biology, and helps us understand it theologically. It focuses not only on Darwin's work of 150 years ago, but includes contemporary developments in evolutionary biology. Concurrent sessions explore related themes.

## ELCA ALLIANCE FOR FAITH, SCIENCE AND TECHNOLOGY

Dedicated to expanding awareness, encouraging conversation, and promoting action regarding the implications of science and technology for Christian faith and life, the Alliance cooperates with other denominational groups in the Ecumenical Roundtable on Science, Technology and the Church. The Alliance sponsors Sunday Scientist Symposia, which are designed to allow participants – scientists and science educators, pastors, students and interested laypersons – to explore issues of faith and science in ways that facilitate dealing with these issues in the parish setting.

## EVENT PARTNER

Center for Lifelong Learning  
at Luther Seminary
